15-Sep-2025

Support #7993

Association between microbiome, genetic susceptibility and psoriasis severity

- 16S Data (skin and pharynx)
- SNP Data (50 markers)
- Metadata
- 146 samples
 - 40 patients (38 with both skin and pharynx)
 - 68 controls (skin)
- Type
 - Lesional and Non-Lesional
- Severity
 - Continuous PASI values
- Secondary confounders
 - BMI, Age, Sex, Alcohol & Smoking

Challenges

- Data Integration
 - SNP data with Microbiome for PASI severity
- Normalization of microbiome for DI
 - CLR and hope for the best?

Plans

Unsupervised

Supervised - DIABLO

Thank you!
